The matter was last discussed in the 79th meeting of Expert Committee held on 19th and 20th June, 2017 and the Committee recommended the following:

“The applicant made a strong case for the need of this equipment for their testing work and high cost of the original new equipment. However he could not provide the details of the manufacturer and whether the refurbishing done in 2016 was by the OEM. The applicant also stated that the normal life of such equipment is 15 years and is extended atleast by 8-10 years after refurbishment. The Committee agreed to review the case on receipt of the following information :

- i) The original manufacturer of the equipment and whether the refurbishment was done by OEM;
- ii) In case the equipment becomes non-functional within 5 years, an undertaking from the supplier or the principal of the company in the US to take it back.

Now the applicant has confirmed for presentation with all the relevant documents sought by the Ministry.

----	--	----

The applicant informed that NOC was issued for import of second hand equipment for R&D purpose. Out of 1070 (395+675) nos., they need to continue using 66 nos. of equipment which are very much essential to deliver on their commitment to their customers with regards to R&D, testing, critical/regular maintenance support activities and delivering resolutions and work around to issues and support in maintaining the stability of their networks with very stringent Service Level Assurance(SLA) clauses.

The matter was considered in the 79th Meeting of the Expert Committee held during 19th and 20th June 2017. The Committee noted that the applicant has been given permission on 21.06.2013 for import of 1070 items (395+675) for software development and testing purposes with the stipulation that the items would be re-exported within 36 months from the date of issue. The applicant has now made a request that 66 of the items are essential to meet their commitment and therefore the time for their export may be extended. However the applicant has not given details of all the items actually imported and the ones which have already been exported including items for which validity has already been extended by this Ministry. The Committee therefore deferred the proposal and recommended that subsequent to the receipt of the aforesaid information the case will be considered further.

The applicant has now confirmed for presentation on the sought information.

The matter was considered in the 79th Meeting of the Expert Committee held during 19th and 20th June 2017. The Committee recommended the following:

The applicant is in the business of making ZnSO₄ , CuSO₄, MnSO₄ etc. and is proposing to import manganese containing concentrate obtained from the Zinc production plant using electrolytic process. There is no specific item under this description in the Schedule III A and B. however it could perhaps categorise under item A1070 in Sch III A with the description “Leaching residues from zinc processing, dust and sludges such as jarosite, hematite, etc”. Before deliberating further on this item to decide whether it would be categorized as hazardous waste the Committee asked the applicant to obtain the full process details in which this material gets generated. Till then the matter is deferred.

The applicant has confirmed for presentation telephonically with regard to the aforesaid.
